

OVERFINCH BESPOKE VEHICLES

RANGE ROVER
V8 & DIESEL MODELS
(9/94 ON)

► Overfinch Individuality

This guide summarises the latest range of Overfinch specialist enhancements available for Range Rover models. With a unique 26 year pedigree in the Range Rover enhancement business and over £3.8 million spent in R&D, the progressive evolution of Europe's definitive luxury 4x4 marque remains our sole endeavour.

Take time to study this guide to see how it relates to your personal motoring desires and vehicle needs. Through Overfinch you can literally tailor a car to your individual taste. Choose from an exciting range of high quality special equipment and accessories to create a personalised vehicle that is exactly right for you and your family. Uniquely, you can choose to further upgrade your Overfinch at a later date so that it actually improves with age.

Overfinch enhancements will help you realise the full potential of your Range Rover and give many years of immensely enjoyable motoring. Call us today to find out more.

PRICES

Unless otherwise stated, prices include free fitting at the factory. As this guide covers vehicles from the 1994 launch to date allowance should be made for seized components / extra works which may be required on older examples. **N.B.** VAT is not included in the stated prices.

OVERFINCH FINANCE

A variety of financial packages are available for the private and business user to make it easy to own an Overfinch Range Rover. Written details available on request.

OVERFINCH ASSISTANCE

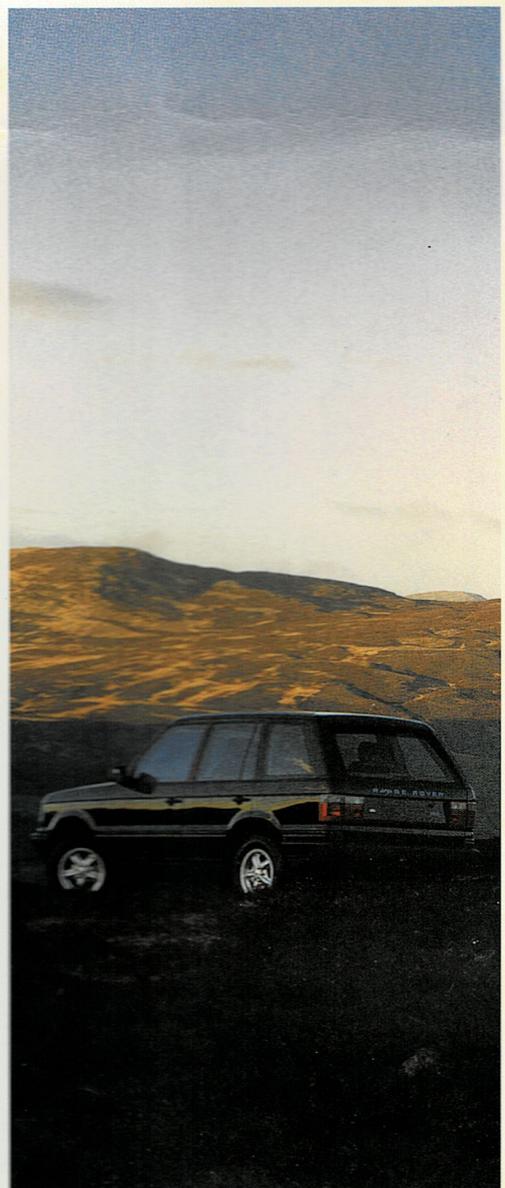

A unique Incident Management Support Package, is available in conjunction with Mondial Assistance Ltd. Free of charge with major conversions for 12 months, this vehicle specific cover provides emergency breakdown/recovery services throughout the UK and Europe; also cover for home and roadside assistance, storage charges following recovery, onward travel or overnight accommodation, replacement car hire for 2 days, vehicle re-delivery, and medical transfers if required. Additionally, in Europe cover includes 2 weeks car hire and the repatriation of passengers. This service is available to anyone driving the vehicle, 24 hours a day, 365 days a year.

OVERFINCH OWNERS INSURANCE

Developed for Overfinch owners in conjunction with a specialist insurance broker. Flexible tailor-made policies, voluntary excess payments and repayment schedules are available.

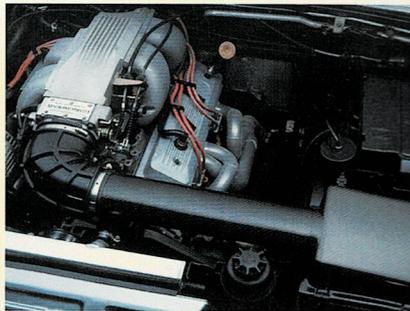

OVERFINCH WARRANTY

Covers the cost of parts and labour for 12 months or 12,000 miles (20,000km), whichever comes first. See also Overfinch Assistance and Warranty under Terms & Conditions of Sale.

"While this may look like an ordinary Range Rover it isn't - not by a long way!. This is a hugely impressive car".

Jeremy Clarkson - 630 R (video)

► Performance

570 GT SPORTS ENGINE PACKAGE (1)

The famous Overfinch / GM compact 5.7 litre 3rd generation V8 in newly updated form offers a large and impressive performance gain over the standard (ex Buick) 4.0/4.6 V8. The 330 bhp and 420lb ft of torque, now spread even wider than previously, will catapult a Range Rover to 60 mph in only 7.7 seconds (verses 10 for a 4.6) and on to a top speed of 125 mph (where legally permitted) in characteristically relaxed style. (Suits models 1994 - 1998 inclusive). Optional extras: catalytic convertors & sports exhaust system.

price fitted £12,995

see seperate information sheet for full details

630 R HIGH PERFORMANCE ENGINE PACKAGE (2)

New, 4th generation Overfinch/GM (small block) V8 engine, now displacing 6.3 litres produces 400 bhp and 457 lb ft of torque. The torque output is exceptionally linear over a wide rev range which means that surging acceleration is always on tap, usually without recourse to kick-down. Developed from our acclaimed 5.7 litre power units, the new 630 R features high 'swirl' cylinder heads, low friction pistons and valve train, a 20% larger induction system plus a special longer stroke high strength crankshaft. Quite extraordinary performance (e.g. 0 - 60 in just 6.6 seconds) is combined with surprisingly acceptable fuel consumption in everyday use thanks to the advanced engine management system and high overall torque values. This near Supercar performance is achieved in a uniquely effortless and cultured manner that all occupants will appreciate on the open road, whilst town work elicits only impeccable behaviour. A power plant with such an intoxicating dual personality would be compelling on its own. However, coming from the world's largest motor manufacturer General Motors, you can also take big company endurance and reliability for granted with strong residual value and demand as a happy consequence.

Optional extras: catalytic convertors & sports exhaust system.

price fitted £16,895

see seperate information sheet for full details

DUAL STAINLESS SPORTS EXHAUST SYSTEM (3)

Designed to enhance performance and the rear appearance of your Range Rover, this stainless steel system connects downstream of the Catalyts and emits an appealing, sonorous note without being in any way tiresome. Being specially flow tested means that back pressure is almost completely eliminated, to the benefit of performance. The system provides elegant polished oval tail pipes, neatly recessed up into the bumper, exiting on each side of the vehicle, as featured on many of the world's most exclusive cars. Guaranteed for 6 years. Suits all V8 engined models, 4.0 to 6.3 litres.

price fitted £842

V8 PERFORMANCE UPGRADE CHIP (4)

Fully re-mapped engine management computer (ECU) improves performance, especially in everyday driving and enhances throttle response throughout the rev range. Part throttle acceleration is also improved and fuel consumption scarcely affected. Adds approximately 14 bhp and 18 lb/ft torque. Beneficial to 4.0 and 4.6 litre Land Rover V8 engines.

price fitted from £426

DIESEL PERFORMANCE UPGRADE CHIP (5)

Highly effective performance enhancement for all BMW diesel engined models. Re-mapped engine ECU with optimised boost and fuelling curves adds approximately 28 bhp and 30 lb ft torque noticeably improving all aspects of vehicle boosted performance. Fuel efficiency is almost unharmed and driveability of manuals in particular is improved. An essential upgrade for every DSE/DHSE driver.

price fitted from £530
