*"...I would cheerfully kill for an
Overfinch Range Rover"*

Land Rover Monthly

(shows 11, 12 & 15)

“It is a hugely desirable luxury express that maintains the Overfinch tradition for vastly improving the road performance of the Solihull flagship without compromising it’s other strengths”.

LRO International

LAMBSWOOL FOOTWELL RUGS (18)

When a smarter occasion beckons, why not remove your car’s utility mats of our Bentley quality, deep pile lambswool rugs? Available in a wide range to match or contrast, they instantly transform the interior from practical to luxurious delight for all occupants. Includes integral leather heel mat for driver.

Footwell set prices from £448

Loadspace rug prices from £285

OVERFINCH DOOR THRESHOLD PLATES (19)

These attractive, polished stainless steel tread plates, incorporating the Overfinch logo etched into the surface improve the interior style of any Range Rover. price (set of 4) £175

ALCANTARA HEADLINING AND PARCEL TRAY (20)

Alcantara is a soft, luxurious suede-like material that is washable and dirt resistant. Favoured by Ferrari and Maserati, we now offer this exclusive option for the Range Rover. The standard, often soiled headliner is removed and retrimmed in a choice of 3 shades (Black, Cream or Charcoal) as are all 8 pillar covers, the sun visors and the rear parcel tray with its side panels. The result is very tactile and is frequently admired by passengers. price fitted £1,895

INTERIOR COLOUR CHANGE (21)

Few realise that it is entirely possible to completely change your vehicle’s interior colour scheme. A choice of 5 primary colourways and 8 carpet colours allows for personalisation and enhancement. Please enquire for relevant details.

INTEGRATED TV & DVD SYSTEM (22)

For the entertainment of rear seat occupants, a professional TV / DVD system can be integrated in the rear of the centre console with widescreen TV monitors neatly built into the head restraints. Comes complete with infrared cordless headphones which are stored in overhead net pockets. Excellent colour TV reception (stationary) plus cinema quality surround sound and picture from inbuilt DVD player (on the move or stationary). If your vehicle also has satellite navigation the front GPS screen can show TV or DVD films when the car is stationary as an extra cost option.

price fitted from £4,995

REAR SEAT HEATING (23)

Like heated front seats the rears can be fitted with heating elements, governed by thermostatic control and individual switches. Rear seat passengers will feel pampered to be quickly warmed on chilly mornings and evenings. (Seat folding is unaffected)

price fitted £685

INTERIOR UPDATE TO 2000 MODEL LOOK (24)

Modified inner door metalwork allows fitment of the latest door trim panels with larger, integrated and padded door pull/armrest assemblies, plus colour coded lock buttons and door handle esoutcheons. The new trims also incorporate saddle stitched leather inserts in lieu of the previous cloth type. Together the changes give a far more substantial, luxurious feel to the interior. Recommended with Chrome Interior Door Handle option.

► Safety & Convenience

INTEGRATED DVD SATELLITE NAVIGATION SYSTEM (25)

An exclusive development between Overfinch and Alpine Electronics UK creates a state of the art GPS installation. By using the very latest DVD technology, the whole of UK and Europe is now shown on one disc (previously 6). DVD is much faster and more accurate than the outdated CD system. Clear visual and audible instructions (in a choice of six languages) from a widescreen 6.5 inch in-built colour monitor. A specially designed Overfinch screen housing allows an immaculate result with command buttons for ease of operation. This whole assembly is coach built into the upper dash coin pocket and gives precision guidance by spoken directions, pictograms and adjustable scale maps (with zoom facility). Once sampled you will never want to be without satellite navigation in your car. Optional extra: TV tuner.

price fitted from £2,995

7 SEATER CONVERSION (26)

Ingenious folding and stowing 2 person rear facing bench seat. Unique purpose designed hinge system permits the seat to be folded up then neatly stowed flat against the existing back seat, so avoiding wasted space. Comes complete with 3 point safety belts. Suitable for children up to approximately 5 ft. (1.52m). Large, contoured cushions ensure good long distance comfort. Upholstered in matching original equipment leather (or cloth when available). Quickly removable by hand when not required - no tools needed (see separate leaflet for full details).

price £895 + fitting

INTERIOR & ENGINE PRE-HEATER SYSTEM (27)

A miniature independent heater unit allows you to drive off in a fully de-iced, warmed up car. This is clearly far safer, more comfortable and could save money (since an engine is at its most inefficient when warming up). Suitable for both petrol and diesel cars, the heater is well proven in Europe and beyond. It enables you to pre-select a heating time of up to an hour before you want to drive away, the unit's integral pump then circulates warmed coolant through the engine and heater which warms the interior and de-ices the windows.

Optional extra: remote operation via GSM phone.

price fitted from £1,295

PRIVACY GLASS (28)

Available in three colours and three different tints, smoked Privacy Glass is becoming an increasingly popular means of reducing glare (up to 38%) and solar heat transmission (up to 44%) so increasing occupant comfort. Choose from green, bronze or grey to give a very exclusive looking vehicle. An anti-vandal version is also available which offers good protection from 'smash and grab' thieves for added peace of mind.

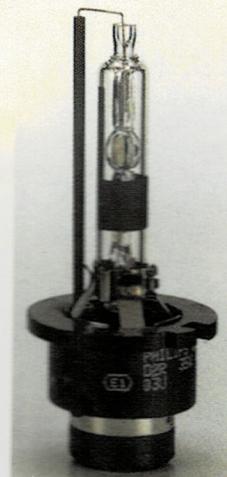

Smoked Privacy Glass price fitted from £495

Anti-vandal Privacy Glass price fitted from £795

ELECTRONIC PARKING AID (29)

Ultrasonic parking sensors are now a familiar sight on prestige vehicles and for very good reason. This neat system senses approaching danger when reversing and gives a warning 'tone' and visual indication inside the car. When the sound becomes continuous you'll be within 10 - 15 centimetres of the obstacle and know to stop. The ultrasonic sensors are flush fitted in the rear bumper and are almost impervious to dirt build up. A valuable safety aid that could easily pay for itself the very next time you park.
