Engine Number Identification

We have included a reference chart of Rover V8 engine numbers from 1970 onwards, which will help you to identify the engine fitted to your vehicle. The engine number of most Rover V8s is stamped on the left hand side of the block deck, adjacent to the dipstick tube, although some very early engines had the number stamped on the bellhousing flange at the rear of the block. The chart also contains a brief description of features, such as compression ratio and gearbox type and also the approximate year of production.

Therefore, if your engine has been changed at some time, it should still be possible to correctly identify it. To ensure you receive the correct parts, please have your engine number ready before ordering. Note: "Pulsair" and "Air Injection" are terms applied to engines equipped with Air Rail type cylinder heads; ie cylinder heads with steel pipes located in holes just above the exhaust ports (fitted to carb Range Rover & TR8 engines only). "Detoxed" refers to a variety of emission control devices - including Air Rails - fitted to carb engines.

Rover V8 Engine Numbers

Factory 3.5 Litre Engines		
Engine Number	Application	Approximate Year
84000001A	P5 3500 10.5:1cr
