

Defender one touch indicator installation instructions.

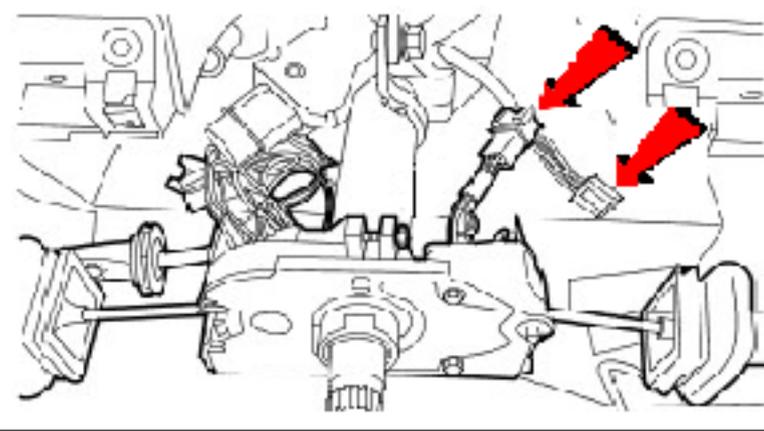

Step:1
Remove 6 screws from
lower steering cowl

Step:2
Locate the indicator switch
connector and disconnect

Step:3
Now connect your one touch
harness inline (ARROWED)

Step:4
Now remove your dash
center (TDCI SHOWN)

Step:5
Now with the center dash
removed locate your cigarette
lighter connector and disconect.
Now connect the remaining
cable from your one touch in
line with your cigarette lighter.
(In the same way you have done
with the indiactor stalk
connector.

Step:6
Now refit the dash center.
Your one touch idicator kit
installation is now complete.

We hope you enjoy your new
upgrade.
